

1978–2018

Moulds, presses and robots that can see the sea, sophisticated, always contemporary materials daring designs and rounded corners, intelligent objects and seductive surfaces. It all began with a visor, a symbol for looking forward to a never-ending journey twist form and function for competitions, mobility, safety, lifestyle, design, automotive, manufacturing that does research, looks for solutions, plans sustainable development.

It is the future that there has always been.

Maurizio and Giuliano Romagnoli are pleased to invite you to Techpol's 40th anniversary celebrations

1978–2018
